1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for Ecoreal on Ecoreal V3. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

Technical details of individual findings are omitted from this public summary to limit disclosure of security-sensitive information. The complete audit report was delivered privately to Ecoreal, who retain it as the full record of the engagement. Recipients of the full report can use the SHA-256 hash in this summary's attestation to confirm that their copy matches the referenced report.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

4 Copyright and License

© 2026 Cyfrin Inc. All rights reserved. Material from Ecoreal or third parties remains the property of its owners.

This summary may be shared only in complete and unmodified form, so that any copy can be checked against the hash in its attestation. Short quotations with attribution to Cyfrin are permitted, provided they do not misrepresent this summary's scope or results. Except as permitted by applicable law, no part of this summary may otherwise be copied, modified, adapted, sold or sublicensed, or used to create derivative works, without Cyfrin's prior written permission.

Cyfrin and the Cyfrin logo are trademarks of Cyfrin Inc. and may not be used to suggest that Cyfrin has reviewed or endorses anything outside this summary's scope, or to misrepresent its results.

5 Audit Overview

Over the course of 2 days, the Cyfrin team conducted an audit on the Ecoreal V3 code provided by Ecoreal. The findings consist of 2 Medium & 6 Low severity issues with the remainder being informational.

Summary

Project Name	Ecoreal V3
Repository	ecoreal-smartcontract
Commit	70ad54e84d21...
Fix Commit	6c3b8dc7d4eb...
Audit Timeline	Nov 11th - Nov 12th, 2026
Methods	Manual Review, Proprietary AI

Issues Found

Severity	Found	Resolved	Acknowledged
Critical Risk	0	0	0
High Risk	0	0	0
Medium Risk	2	1	1
Low Risk	6	5	1
Informational	4	4	0
Gas Optimizations	0	0	0
Total	12	10	2

How to read the statuses

Resolved means Cyfrin verified the remediation documented in the full report with a Cyfrin verification note. Acknowledged means Ecoreal chose to retain the reported behavior or accept the residual risk; this does not constitute resolution or endorsement by Cyfrin. Finding-specific explanations and verification notes are recorded in the full report.

Risk Classification

	Impact: High	Impact: Medium	Impact: Low
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

6 Audit Scope

The audit scope was limited to the following files:

```
src/ecoreal-v3.sol
```

7 Protocol Summary

ECOREAL is a fixed-supply ERC20 token on Ethereum mainnet that replaces the project's earlier token of the same name. It is implemented as a single non-upgradeable contract, `EcorealV3`, built on OpenZeppelin's ERC20, burn, pause and two-step ownership modules. The full supply of one billion tokens is created at deployment and there is no minting function.

The contract integrates with Uniswap V2. Transfers into or out of the ECOREAL/WETH pair, or any other pair the owner marks, pay a buy or sell fee that is split into a liquidity share, a treasury share and a burn share, while ordinary wallet-to-wallet transfers are free. The liquidity share accumulates in the contract and is converted into ECOREAL/WETH liquidity whose LP tokens are sent to the zero address, locking it permanently. A maximum amount per transfer and a maximum balance per wallet apply to all holders except exempt addresses.

8 Attestation

Cyfrin attests that it performed a security review of the Ecoreal V3 code provided by Ecoreal.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2026-11-12-cyfrin-ecoreal-v3-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Ecoreal has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=4494ce0d56b6b10f7b123499fcefab19aa2e5f0e37cb0c03eabd6fc77631ac53
F=2026-11-12-cyfrin-ecoreal-v3-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
