1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for StakePet on StakePet. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 1.1 dated September 19, 2023, was delivered to StakePet, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

4 Copyright and License

This summary may be shared only in complete and unmodified form, so that any copy can be checked against the hash in its attestation. Short quotations with attribution to Cyfrin are permitted, provided they do not misrepresent this summary's scope or results. Except as permitted by applicable law, no part of this summary may otherwise be copied, modified, adapted, sold or sublicensed, or used to create derivative works, without Cyfrin's prior written permission.

Cyfrin and the Cyfrin logo are trademarks of Cyfrin Inc. and may not be used to suggest that Cyfrin has reviewed or endorses anything outside this summary's scope, or to misrepresent its results.

5 Audit Overview

Over the course of 6 days, the Cyfrin team conducted an audit on the StakePet code provided by StakePet. The findings consist of 2 High, 2 Medium & 2 Low severity issues with the remainder being gas optimizations.

Summary

Project Name	StakePet
Repository	StakePet
Commit	48d46306e7ad...
Audit Timeline	Sep 1st - Sep 8th, 2023
Methods	Manual Review

Issues Found

Severity	Found	Resolved	Acknowledged
Critical Risk	0	0	0
High Risk	2	2	0
Medium Risk	2	1	0
Low Risk	2	2	0
Informational	0	0	0
Gas Optimizations	6	6	0
Total	12	11	0

The report's Issues Found table records no final status, so statuses are taken from each finding's final Cyfrin response: findings Cyfrin verified as fixed are counted as resolved. The report's table counts two Medium findings but describes only one; the undescribed Medium finding has no recorded status and is left out of both the resolved and acknowledged columns.

6 Audit Scope

All files in the `src` and `script` directories except mock contracts are in scope.

7 Risk Classification

	Impact: High	**Impact: Medium**	**Impact: Low**
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

8 Protocol Summary

StakePet.com is a platform where users invest in virtual pets and earn rewards. Each pet requires regular feeding, and neglecting to feed them may result in losing funds. Users can withdraw their funds at any time, but there are reduced rewards for early withdrawals. The earlier you enter and accumulate “milk” tokens, the greater your share of the total rewards.

9 Attestation

Cyfrin attests that it performed a security review of the StakePet code provided by StakePet.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin’s repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2023-09-19-cyfrin-stakepet.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin’s full audit report with all findings provided to StakePet has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=6880a558dda883557be5299ba967fb011b217812cd2a931f8cd5c52e50309915
F=2023-09-19-cyfrin-stakepet-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
