1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for Remora on Remora. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 2.0 dated July 4, 2025, was delivered to Remora, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

4 Copyright and License

5 Audit Overview

Over the course of 6 days, the Cyfrin team conducted an audit on the Remora code provided by Remora. The findings consist of 3 Critical, 3 High, 17 Medium & 13 Low severity issues with the remainder being informational and gas optimizations.

Summary

Project Name	Remora
Repository	remora-smart-contracts
Commit	0219ab16f594...
Fix Commit	9051af840f92...
Audit Timeline	June 23rd - June 30th, 2025
Methods	Manual Review, Fuzz Testing

Issues Found

Severity	Found	Resolved	Acknowledged
Critical Risk	3	3	0
High Risk	3	3	0
Medium Risk	17	17	0
Low Risk	13	9	4
Informational	9	9	0
Gas Optimizations	12	12	0
Total	57	53	4

6 Audit Scope

The original audit scope at commit 0219ab16f594283ed245fb188ce70e4a9ef987ea was:

```
contracts/RWAToken/BurnStateManager.sol
contracts/RWAToken/DividendManager.sol
contracts/RWAToken/DocumentManager.sol
contracts/RWAToken/LockUpManager.sol
contracts/RWAToken/RemoraToken.sol
contracts/AccessManager.sol
contracts/Allowlist.sol
contracts/PledgeManager.sol
contracts/ReferralManager.sol
contracts/RemoraIntermediary.sol
contracts/TokenBank.sol
```

A new contract `contracts/PaymentSettler.sol` was added and modifications made to existing contracts at commit f929ff115f82e76c8eb497ce769792e8de99602b during the audit; the new contract and the changes to existing contracts were reviewed as part of the audit.

7 Risk Classification

	Impact: High	**Impact: Medium**	**Impact: Low**
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

8 Protocol Summary

Remora is developing a Real-World Asset (RWA) protocol which enables physical real estate developers to tokenize and sell fractional shares of physical properties to investors worldwide. Investors can earn a share of passive rental income, receiving regular payouts without the burden of traditional landlord responsibility.

9 Attestation

Cyfrin attests that it performed a security review of the Remora code provided by Remora.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2025-07-04-cyfrin-remora-pledge-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Remora has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=ed9c7a69f9bb04bcdd599d9f66b821c5dcb6269f1b36a04160aa3bdf0026b0aa
F=2025-07-04-cyfrin-remora-pledge-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
