# 1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

# 2 About This Document

This document is a public summary of the security audit Cyfrin performed for Ondo on Ondo Global Markets. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 2.0 dated July 14, 2025, was delivered to Ondo, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

# 3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

# 4 Copyright and License

# 5 Audit Overview

Over the course of 10 days, the Cyfrin team conducted an audit on the Ondo Global Markets code provided by Ondo. The findings consist of 2 Low severity issues with the remainder being informational.

**Summary**

| | |
|---|---|
| Project Name | Ondo Global Markets |
| Repository | rwa-internal |
| Commit | a74d03f4a71b... |
| Audit Timeline | Jul 1st - Jul 14th, 2025 |
| Methods | Manual Review |

**Issues Found**

| Severity | Found | Resolved | Acknowledged |
|---|---|---|---|
| Critical Risk | 0 | 0 | 0 |
| High Risk | 0 | 0 | 0 |
| Medium Risk | 0 | 0 | 0 |
| Low Risk | 2 | 1 | 1 |
| Informational | 10 | 10 | 0 |
| Gas Optimizations | 0 | 0 | 0 |
| Total | 12 | 11 | 1 |

# 6 Audit Scope

All files under `contracts/globalMarkets`:

```
contracts/globalMarkets/GMTokenCompliance/OndoComplianceGMClientUpgradeable.sol
contracts/globalMarkets/GMTokenCompliance/OndoComplianceGMView.sol
contracts/globalMarkets/issuanceHours/IssuanceHours.sol
contracts/globalMarkets/onUSDManager/onUSDManager.sol
contracts/globalMarkets/sanityCheckOracle/OndoSanityCheckOracle.sol
contracts/globalMarkets/tokenFactory/GMTokenFactory.sol
contracts/globalMarkets/tokenManager/GMTokenManager.sol
contracts/globalMarkets/tokenPauseManager/TokenPauseManager.sol
contracts/globalMarkets/tokenPauseManager/TokenPauseManagerClientUpgradeable.sol
contracts/globalMarkets/BridgeRegistrarStub.sol
contracts/globalMarkets/GMToken.sol
contracts/globalMarkets/onUSD.sol
contracts/globalMarkets/onUSDFactory.sol
contracts/globalMarkets/TokenManagerRegistrar.sol
```

During the audit, the USD stablecoin was renamed from `onUSD` to `USDon` in commit 85d5b09.

# 7 Risk Classification

| | **Impact: High** | **Impact: Medium** | **Impact: Low** |
|---|---|---|---|
| **Likelihood: High** | Critical | High | Medium |
| **Likelihood: Medium** | High | Medium | Low |
| **Likelihood: Low** | Medium | Low | Low |

# 8 Protocol Summary

Ondo Global Markets is a new product by Ondo that enables users to tokenize publicly traded securities on-chain. KYC'd users can interact with Ondo to purchase GMTokens, which are tokenized representations of real-world securities. These tokens can then be freely traded on-chain. GMTokens can only be minted or burned during normal trading hours (24/5).

The system also introduces a stablecoin, `USDon`, which represents cash held by Ondo at a brokerage. This is the token used to purchase securities. A dedicated contract, `usdonManager`, facilitates swaps into `USDon` from supported stablecoins (e.g., `USDC`).

## 8.1 Key Components

- `USDon`: A stablecoin backed by cash held at a brokerage. It can only be held or transferred by compliant users.
- `usdonManager`: An `RWAManager` contract that enables users to swap supported stablecoins into `USDon`.
- `GMTokens`: Tokenized representations of public securities. Can only be held or transferred by compliant users.
- `GMTokenManager`: Manages the buying and selling of GMTokens. Integrates with `usdonManager` to allow swaps from other stablecoins into `USDon`, and applies compliance checks and trading hours (24/5).

# 9 Attestation

Cyfrin attests that it performed a security review of the Ondo Global Markets code provided by Ondo.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2025-07-14-cyfrin-ondo-global-markets-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Ondo has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=8209525ff3a324c86ffbf58f868cef18c1e8be40941ca89e46b0d3cbb5aeadd5
F=2025-07-14-cyfrin-ondo-global-markets-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
