1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for Strata Money on Strata Tranches. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 2.0 dated October 8, 2025, was delivered to Strata Money, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

5 Audit Overview

Over the course of 8 days, the Cyfrin team conducted an audit on the Strata Tranches code provided by Strata Money. The findings consist of 1 Critical, 2 High, 6 Medium & 5 Low severity issues with the remainder being informational and gas optimizations.

Summary

Project Name	Strata Tranches
Repository	contracts-tranches
Commit	af5195b04712...
Fix Commit	1f82c6a45627...
Audit Timeline	Sep 22nd - Oct 1st, 2025
Methods	Manual Review

Issues Found

Severity	Found	Resolved	Acknowledged
Critical Risk	1	1	0
High Risk	2	2	0
Medium Risk	6	6	0
Low Risk	5	5	0
Informational	12	9	3
Gas Optimizations	2	2	0
Total	28	25	3

6 Audit Scope

The scope of this audit was limited to:

```
contracts/governance/AccessControlled.sol
contracts/governance/AccessControlManager.sol
contracts/governance/StrataMasterChef.sol
contracts/tranches/base/cooldown/ERC20Cooldown.sol
contracts/tranches/base/cooldown/UnstakeCooldown.sol
contracts/tranches/base/CDOComponent.sol
contracts/tranches/base/Tranche.sol
contracts/tranches/oracles/AprTupleFeed.sol
contracts/tranches/strategies/ethena/sUSDeCooldownRequestImpl.sol
contracts/tranches/strategies/ethena/sUSDeStrategy.sol
contracts/tranches/strategies/Strategy.sol
contracts/tranches/utils/UD60x18Extra.sol
contracts/tranches/StrataCDO.sol
contracts/tranches/YieldAccounting.sol
contracts/tranches/StrataCDOStorage.sol
```

7 Risk Classification

	Impact: High	**Impact: Medium**	**Impact: Low**
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

8 Protocol Summary

Strata Money Tranches is a perpetual risk tranching system built around the Ethena ecosystem, specifically around USDe and sUSDe. Strata Tranches is composed of two tranches (Senior and Junior), which allow investors to deposit their assets (USDe or sUSDe) into either tranche based on their risk profile.

- The Senior Tranche offers a steady APR and additional coverage to deposits provided by the Junior Tranche.
- The Junior Tranche offers the possibility to earn a higher yield in exchange for bearing the risk of offering coverage to the Senior's deposits.

The protocol allows deposits using USDe or sUSDe, while all internal accounting is tracked in USDe units. All deposited assets from the two tranches are pooled into a single Strategy contract.

The yield distribution is as follows:

- The Senior Tranche receives a stable yield floor benchmarked to the Sky Savings Rate while retaining the potential upside of the sUSDe APY.
- The Junior Tranche earns all the excess yield after covering the Senior Tranche's target yield.

Key components:

- **Tranches:** Meta Vaults based on the ERC-4626 standard that allow users to deposit USDe and sUSDe. Tranches are the users' entry point into the system: they receive deposits and withdrawal requests and forward the execution to the rest of the system.
- **CDO:** the heart of the protocol. It orchestrates asset flows between the Tranches and the Strategy and interacts with the Accounting contract to track the internal accounting, in USDe units, of all the TVL and yield distribution.

- **Strategy:** responsible for asset management. It receives assets from the CDO, stakes them, and returns them when requested. At any point in time, the Strategy reports its total TVL (including yield).
- **Accounting:** performs pure calculations to track the Junior and Senior TVL and to handle updates to the Senior's target APR. Yield distribution is also calculated by the Accounting contract.

9 Attestation

Cyfrin attests that it performed a security review of the Strata Tranches code provided by Strata Money.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2025-10-08-cyfrin-strata-tranches-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Strata Money has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=df9edde124d9917fb059808d9c6c7237060bbc29f4505856f44c753e55b1c04d
F=2025-10-08-cyfrin-strata-tranches-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
