1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for Securitize on Solana DSToken Whitelist. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 2.0 dated November 7, 2025, was delivered to Securitize, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

4 Copyright and License

5 Audit Overview

Over the course of 2 days, the Cyfrin team conducted an audit on the Solana DSToken Whitelist code provided by Securitize. The findings consist of 2 Informational findings.

Summary

Project Name	Solana DSToken Whitelist
Repository	bc-solana-whitelist-sc
Commit	3aeb8df7a98b...
Fix Commit	2a83f4e3f518...
Audit Timeline	Nov 6th - Nov 7th, 2025
Methods	Manual Review

Issues Found

Severity	Found	Resolved	Acknowledged
Critical Risk	0	0	0
High Risk	0	0	0
Medium Risk	0	0	0
Low Risk	0	0	0
Informational	2	1	1
Gas Optimizations	0	0	0
Total	2	1	1

6 Audit Scope

The audit scope was limited to:

```
programs/dstoken-whitelist/src/instructions/admin/change_admin.rs
programs/dstoken-whitelist/src/instructions/admin/initialize.rs
programs/dstoken-whitelist/src/instructions/admin/mod.rs
programs/dstoken-whitelist/src/instructions/admin/pause.rs
programs/dstoken-whitelist/src/instructions/admin/unpause.rs
programs/dstoken-whitelist/src/instructions/mod.rs
programs/dstoken-whitelist/src/instructions/whitelist.rs
programs/dstoken-whitelist/src/states/dstoken_whitelist_state.rs
programs/dstoken-whitelist/src/states/mod.rs
programs/dstoken-whitelist/src/constants.rs
programs/dstoken-whitelist/src/errors.rs
programs/dstoken-whitelist/src/events.rs
programs/dstoken-whitelist/src/lib.rs
```

7 Risk Classification

	Impact: High	**Impact: Medium**	**Impact: Low**
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

8 Protocol Summary

The DSToken Whitelist manages the investor identity verification and wallet authorization process by orchestrating cross-program invocations (CPIs) to the RWA RBAC system. Investor wallets are onboarded through a coordinated whitelisting flow that links each wallet to a verified identity.

Upon successful whitelisting, this program validates the wallet before executing up to three sequential operations: optionally registering the investor in the identity metadata registry with compliance tracking, optionally adding compliance levels to meet policy engine requirements, and finally attaching the wallet to the verified identity account. The program accepts flexible CPI data parameters to accommodate both simple wallet associations and comprehensive investor onboarding with compliance tier assignments.

9 Attestation

Cyfrin attests that it performed a security review of the Solana DSToken Whitelist code provided by Securitize.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2025-11-07-cyfrin-securitize-dstoken-whitelist-svm-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Securitize has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=b984254d7861f2be0bc0fc71aaab5079d16cdd4f5d895050ec5366ecd04a6266
F=2025-11-07-cyfrin-securitize-dstoken-whitelist-svm-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
