1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for Symbiotic on Symbiotic KeyRegistry. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 2.0 dated December 3, 2025, was delivered to Symbiotic, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

5 Audit Overview

Over the course of 3 days, the Cyfrin team conducted an audit on the Symbiotic KeyRegistry code provided by Symbiotic. The findings consist of 1 Informational finding.

Summary

Project Name	Symbiotic KeyRegistry
Repository	relay-contracts
Commit	4bfd3b425b35...
Audit Timeline	Nov 26th - Nov 28th, 2025
Methods	Manual Review

Issues Found

Severity	Found	Resolved	Acknowledged
Critical Risk	0	0	0
High Risk	0	0	0
Medium Risk	0	0	0
Low Risk	0	0	0
Informational	1	0	1
Gas Optimizations	0	0	0
Total	1	0	1

6 Audit Scope

Cyfrin conducted an audit of the KeyRegistry upgrade for Symbiotic based on the code present in the repository at commit hash 4bfd3b4. The following files constitute the scope of the audit:

```
src/libraries/keys/KeyBlsBls12381.sol
src/libraries/sigs/SigBlsBls12381.sol
src/modules/key-registry/KeyRegistry.sol
src/modules/valset-driver/ValSetDriver.sol
```

7 Risk Classification

	Impact: High	**Impact: Medium**	**Impact: Low**
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

8 Protocol Summary

This upgrade integrates BLS12-381 signature support into the Symbiotic KeyRegistry. New contracts and logic enable BLS12-381 key registration and signature validation, and keep compatibility with the existing validator-set workflow. The registry accepts, stores and verifies BLS12-381 keys alongside the existing BN254 and ECDSA implementations already present in the system.

The purpose of this upgrade is to extend the KeyRegistry so it can support an additional signature scheme without altering the broader consensus flow.

9 Attestation

Cyfrin attests that it performed a security review of the Symbiotic KeyRegistry code provided by Symbiotic.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2025-12-03-cyfrin-symbiotic-key-registry-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Symbiotic has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=4ab2a63f8656e648ec64e53a6bbf7270ada88bc2aa4ac49107de9375dc20913f
F=2025-12-03-cyfrin-symbiotic-key-registry-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
