1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for Myriad on PR151. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 2.0 dated June 5, 2026, was delivered to Myriad, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

4 Copyright and License

This summary may be shared only in complete and unmodified form, so that any copy can be checked against the hash in its attestation. Short quotations with attribution to Cyfrin are permitted, provided they do not misrepresent this summary's scope or results. Except as permitted by applicable law, no part of this summary may otherwise be copied, modified, adapted, sold or sublicensed, or used to create derivative works, without Cyfrin's prior written permission.

Cyfrin and the Cyfrin logo are trademarks of Cyfrin Inc. and may not be used to suggest that Cyfrin has reviewed or endorses anything outside this summary's scope, or to misrepresent its results.

5 Audit Overview

Over the course of 2 days, the Cyfrin team conducted an audit on the PR151 code provided by Myriad. The findings consist of 2 Medium & 5 Low severity issues with the remainder being informational and gas optimizations.

Summary

Project Name	PR151
Repository	polkamarkets-js
Commit	617c40dbf24b...
Fix Commit	a6306bd6d8bb...
Audit Timeline	Jun 1st - Jun 2nd, 2026
Methods	Manual Review

Issues Found

Severity	Found	Resolved	Acknowledged
Critical Risk	0	0	0
High Risk	0	0	0
Medium Risk	2	2	0
Low Risk	5	5	0
Informational	4	4	0
Gas Optimizations	1	1	0
Total	12	12	0

6 Audit Scope

See PR-151 for the full changes. The audit scope was limited to the non-CRE changes in that PR:

```
// changed files
contracts/MyriadCTFExchange.sol
contracts/PredictionMarketV3ManagerCLOB.sol
contracts/WrappedCollateral.sol
contracts/NegRiskAdapter.sol
```

7 Risk Classification

	Impact: High	Impact: Medium	Impact: Low
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

8 Protocol Summary

Myriad is an on-chain prediction-market exchange. `MyriadCTFExchange` is a central-limit order book that settles EIP-712-signed maker/taker orders into ERC1155 outcome tokens minted by a `ConditionalTokens` contract, with `PredictionMarketV3ManagerCLOB` managing market lifecycle and resolution. `NegRiskAdapter` coordinates "neg-risk" events, where several mutually-exclusive binary markets share one event and at most one of them resolves YES, and `WrappedCollateral` (wcol) is a 1:1 ERC20 wrapper around the underlying collateral (USDC.e) that the conditional-tokens layer uses as its collateral asset.

This review covered the non-CRE changes in PR-151, which updated the neg-risk subsystem: the exchange now lets traders pay in underlying while bridging to wcol for conditional-token split/merge (via `NegRiskAdapter::wrapForExchange` and `WrappedCollateral::unwrap`), and per-market and event-level resolution go through `NegRiskAdapter::resolveEvent` and `resolveEventMarket` (routed through `PredictionMarketV3ManagerCLOB::resolveMarket`). The CRE oracle contracts added by the same PR were out of scope.

9 Attestation

Cyfrin attests that it performed a security review of the PR151 code provided by Myriad.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2026-06-05-cyfrin-myriad-pr151-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Myriad has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=a85a223b645a848a92e63183cb645edcf8058bd951eac5e76cc15f68f264ed8d
F=2026-06-05-cyfrin-myriad-pr151-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
