1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for Securitize on MatchHandler. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 2.0 dated June 11, 2026, was delivered to Securitize, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

4 Copyright and License

5 Audit Overview

Over the course of 2 days, the Cyfrin team conducted an audit on the MatchHandler code provided by Securitize. The findings consist of 2 Low severity issues with the remainder being informational and gas optimizations.

Summary

Project Name	MatchHandler
Repository	bc-ats-sc
Commit	709be1e8839a...
Fix Commit	cf4db7a5e09a...
Audit Timeline	June 9th - June 10th, 2026
Methods	Manual Review

Issues Found

Severity	Found	Resolved	Partially Resolved	Acknowledged
Critical Risk	0	0	0	0
High Risk	0	0	0	0
Medium Risk	0	0	0	0
Low Risk	2	2	0	0
Informational	2	1	1	0
Gas Optimizations	2	2	0	0
Total	6	5	1	0

6 Audit Scope

The audit scope was limited to:

```
contracts/ats/MatchHandler.sol
contracts/base/MatchHandlerStorage.sol
```

7 Risk Classification

	Impact: High	**Impact: Medium**	**Impact: Low**
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

8 Protocol Summary

`MatchHandler` is the on-chain settlement contract for Securitize's Alternative Trading System (ATS): an off-chain matching engine pairs buy and sell orders for DS Protocol security tokens, and the contract settles each matched trade in a single transaction by:

- moving the DS Token from seller to buyer
- paying the seller in a stablecoin net of fees
- routing the combined seller and buyer fees to a custodial wallet
- registering the buyer in the DS Registry

It uses EIP-7201 namespaced storage, targets Ethereum, Arbitrum and Avalanche C-Chain, and on its settlement path holds no balances of its own, transferring tokens directly between the trade parties.

9 Attestation

Cyfrin attests that it performed a security review of the MatchHandler code provided by Securitize.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2026-06-11-cyfrin-securitize-matchHandler-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Securitize has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=ccf6be899fcd50ab610536dd5a1bdef7d1d2f45bea3e4d45ed95917798f460ad
F=2026-06-11-cyfrin-securitize-matchHandler-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
