1 About Cyfrin

Cyfrin is a Web3 security company dedicated to bringing industry-leading protection and education to our partners and their projects. Our goal is to create a safe, reliable, and transparent environment for everyone in Web3 and DeFi. Learn more about us at cyfrin.io.

2 About This Document

This document is a public summary of the security audit Cyfrin performed for Accountable on PR75. It records the repositories and commits reviewed, the timeline, auditors, in-scope files, and the number and final status of findings by severity. It closes with Cyfrin's attestation of the review's scope and final remediation status.

It is deliberately abbreviated: the technical detail of individual findings is not reproduced here. The complete audit report, version 2.0 dated June 30, 2026, was delivered to Accountable, who retain it as the full record of the engagement. This summary was issued on October 29, 2026.

3 Disclaimer

The Cyfrin team makes every effort to find as many vulnerabilities in the code as possible in the given time but holds no responsibility for the findings in this document. A security audit by the team does not endorse the underlying business or product. The audit was time-boxed and the review of the code was solely on the security aspects of the in-scope code being audited. Unless the scope explicitly notes otherwise, the review is limited to the application layer and does not extend to the correctness of API/SDK/execution environment implementations, compilers, standard and third-party libraries, underlying operating systems and hardware.

5 Audit Overview

Over the course of 4 days, the Cyfrin team conducted an audit on the PR75 code provided by Accountable. The findings consist of 4 Medium & 7 Low severity issues with the remainder being informational and gas optimizations.

Summary

Project Name	PR75
Repository	credit-vaults-internal
Commit	69f74ade0441...
Fix Commit	fcc871a3fca7...
Audit Timeline	June 23rd - June 26th, 2026
Methods	Manual Review

Issues Found

Severity	Found	Resolved	Acknowledged
Critical Risk	0	0	0
High Risk	0	0	0
Medium Risk	4	4	0
Low Risk	7	7	0
Informational	11	11	0
Gas Optimizations	3	3	0
Total	25	25	0

6 Audit Scope

The audit scope was limited to the contents of PR75:

```
// new
src/factory/DepositGatewayFactory.sol
src/modules/DepositGateway.sol
// added extra fields
src/strategies/storage/YieldStorage.sol
// some changes
src/strategies/AccountableYield.sol
```

7 Risk Classification

	Impact: High	**Impact: Medium**	**Impact: Low**
Likelihood: High	Critical	High	Medium
Likelihood: Medium	High	Medium	Low
Likelihood: Low	Medium	Low	Low

8 Protocol Summary

Accountable is a net-asset-value (NAV) based yield and credit strategy. `AccountableYield` is a strategy attached to an asynchronous ERC4626-style vault: users deposit an arbitrary per-instance ERC20 at the current NAV-derived share price, a borrower draws the deposited capital, and the deployed value is periodically reported through `publishRate`, which drives the share price and accrues performance and management fees as newly minted shares. Redemptions are asynchronous through a withdrawal queue. The system is deployed per strategy across Ethereum Mainnet, Arbitrum One, Citrea, Monad and Bob.

PR75 ("deposit gateway") adds an opt-in batching layer in front of the strategy's synchronous deposit path:

- `DepositGatewayFactory` deploys a `DepositGateway` bound to one strategy; once the gateway is set on the strategy via `setDepositGateway`, deposits go through the gateway and commit before the next NAV is published.
- Depositors escrow assets through `requestDeposit`; an epoch closes when the strategy publishes a new NAV (or via `forcePassEpoch`), after which `settle` mints vault shares for each escrowed request and `refund` / `cancelDeposit` return escrow.

PR75 also reworks the performance-fee high-water mark from an absolute-asset peak to a per-share-price ratio (`peakSharePrice`).

9 Attestation

Cyfrin attests that it performed a security review of the PR75 code provided by Accountable.

The repositories, commits, review period and findings with their final status are in the Summary and Issues Found tables in Section 5, and the in-scope files in Section 6. This attestation is limited to the documented scope, audited commits and mitigations specifically reviewed by Cyfrin.

Cyfrin publishes this document and its SHA-256 hash at https://github.com/Cyfrin/cyfrin-audit-reports. To check a copy on macOS or Linux, run the following in the folder that contains it; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name. Before running it, check that the URL is Cyfrin's repository.

```
U=https://github.com/Cyfrin/cyfrin-audit-reports/raw/main/reports/sha256
N=2026-06-30-cyfrin-accountable-pr75-v2.0.pdf
F=$N
H=$(curl -fsSL $U/$N.sha256 | cut -d' ' -f1)
echo "$H *$F" | shasum -a 256 -c
```

Cyfrin's full audit report with all findings provided to Accountable has the SHA-256 hash and file name below. To check a copy of it, first check this document as above, then run the following in the folder that contains the full report; it prints `OK` when the copy matches. If the copy was renamed, set F to its file name.

```
H=4ed4344dabcaefacfb93697ec7e237127d94c5972a7b590c3007c48859b1679a
F=2026-06-30-cyfrin-accountable-pr75-v2.0-full.pdf
echo "$H *$F" | shasum -a 256 -c
```

On Linux, `sha256sum -c` can be used in place of `shasum -a 256 -c`. On Windows, run `Get-FileHash <file> -Algorithm SHA256` in PowerShell and compare the result with the hash.
